	Dillon Durnford-Geszvain	2622
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to the amendment after non-final rejection filed 6/26/2007.		
2. The allowed claim(s) is/are <u>1-5</u> .		
 3.		
each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).		
6. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

Allowable Subject Matter

1. Claims **1-5** are allowed.

2. The following is an examiner's statement of reasons for allowance: the cited prior art neither anticipates nor renders obvious the claimed limitation of a separation region being narrower under one transfer electrode, of a predetermined set of transfer electrodes that correspond to a single pixel, than the other transfer electrodes of the predetermined set.

US 4,995,061 (Hynecek) shows a separation region that is narrower in one part than in other parts, see Fig. 3. However, there is only one transfer electrode per pixel and therefore it cannot be construed to be narrower under one transfer electrode than under another.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6,369,413 (Hynecek), teaches an anti-blooming structure 113 but does not teach that a separation region is narrower over one of a plurality of transfer regions. US 5,057,926 (Watanabe) teaches the general structure of a vertical overflow drain and separation region, but does not teach a narrower region in the separation
